

Hobbs Finance Engine — Full Cost Breakdown

**Prepared by: Chad A. Dozier Sr. | Dozier Holdings Group /
AthlynXAI / Softmor**

For: Jacob Windham, Finance Manager — Hobbs Dealership

Date: June 2026

Executive Summary

The Hobbs Finance Engine is a custom, full-stack dealership platform — not a subscription to someone else’s software. It is built specifically for Hobbs, runs on private AI infrastructure, and is owned by the dealership once delivered. The investment below reflects a custom build, not a license fee.

Module-by-Module Build Cost

#	Module	One-Time Cost
1	Custom Dealership Website — branded, mobile-first, SEO-optimized	\$3,500
2	Online Credit App & Pre-Qualification Engine — soft-pull, lead routing	\$4,500
3	Automated Finance Document Assembly — buyer's order, TILA, RIC, GAP, VSC	\$6,500
4	OFAC / Red Flags Identity Compliance — automated, audit trail on every deal	\$2,500
5	E-Sign Integration — customer signs on any device, full audit trail	\$2,000
6	F&I CRM Pipeline — lead-to-funded tracking, stip management, dashboard	\$5,500
7	AI Document Engine — private cloud deployment, pre-qual scoring	\$4,000
8	SEO & Lead Generation Setup — keyword strategy, Google setup, content	\$1,500

#	Module	One-Time Cost
9	Hardware Integration (Softmor) — workstation config, network, e-sign setup	\$2,000
10	Training & Onboarding — live walkthrough, manager training, documentation	\$1,000
	TOTAL ONE-TIME BUILD	\$33,000

Monthly Ongoing Costs (Post-Launch)

Service	Monthly Cost
AI Engine Hosting (private cloud)	\$350/mo
Platform Maintenance & Updates	\$500/mo
SEO & Lead Gen Management	\$400/mo
Support & SLA (direct line, 24hr response)	\$250/mo
TOTAL MONTHLY	\$1,500/mo

Note: Monthly costs begin at launch. First 30 days of support

included in the build cost.

Payment Structure — Option A: 50% / 50%

(Recommended)

Milestone	Amount	Timing
50% Upfront — Project Kickoff	\$16,500	At contract signing
50% at Completion — Final Delivery	\$16,500	When system is live, tested, team trained
TOTAL	\$33,000	

Upfront payment covers: Website design, credit app, AI infrastructure setup, Softmor hardware assessment.

Final payment triggered by: All 10 modules live and tested. Finance team trained and signed off. First real deal run through the system.

Payment Structure — Option B: 3-Milestone Industry Standard

Milestone	%	Amount	Timing
Kickoff / Discovery	33%	\$10,890	At contract signing
Mid-Point Delivery	33%	\$10,890	Website, credit app, CRM live in staging
Final Delivery & Launch	34%	\$11,220	All modules live, team trained
TOTAL	100%	\$33,000	

Build Timeline

Phase	Duration	Deliverables
Discovery & Design	Week 1–2	Architecture, wireframes, brand kit, infrastructure
Core Build	Week 3–6	Website, credit app, CRM, document engine
Compliance & Integration	Week 7–8	OFAC, e-sign, lender portal routing
Testing & QA	Week 9	Full deal flow tested end-to-end
Training & Launch	Week 10	Finance team onboarded, system live

Total build time: 10 weeks from contract signing.

What Hobbs Pays Elsewhere

Solution	Cost	What You Get
RouteOne / DealerSocket	800–2,500/mo license	Shared platform, no customization, you don't own it
Reynolds & Reynolds F&I	1,200–3,000/mo	Legacy system, heavy IT dependency
National custom agency	60,000–120,000	Same scope, higher price, no AI, no local relationship
Hobbs Finance Engine	33,000+ 1,500/mo	Custom, you own it, private AI, local team

At \$1,500/month, the Hobbs Finance Engine pays for itself if it funds one additional deal per month that would have otherwise been a kicked contract or a lost lead.

What Hobbs Owns at the End

- Full source code for the website and all platform modules
- Private AI engine deployment — your data, your environment
- All documentation and training materials

- **Direct relationship with the builders — not a support ticket queue**
-
